VALUE MESSAGING

From just one sample and test, the OSOM® Flu SARS-CoV-2 Combo Test simultaneously detects and differentiates between COVID-19, Flu A, and Flu B in only 10 minutes, allowing healthcare providers to make more informed decisions.

HOW TO WIN

Meet or exceed your customer needs

Clinical Needs

The ability to differentiate between viral infection with similar symptoms, but different treatment protocols, with only one sample and test.

Operational Needs

A seamless sample processing procedure that consists of ready-to-use extraction buffers and only three simple steps to help reduce hands on requirements.

Financial Needs

A unique QC Inside® feature allowing for additional testing components for external quality control testing; no specialized equipment or training required.

PROUDLY MANUFACTURED IN THE USA!

This test has not been FDA cleared or approved. It is authorized by FDA under an EUA for use by authorized laboratories. It has been authorized only for the detection of proteins from SARS-CoV-2, influenza A and influenza B, not for any other viruses or pathogens and is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.
