

The Dirty Truth

Contamination of Commonly-Used Electronics in Schools & Offices

CLOROXPRO

CloroxPro tested over **100** electronic devices from an office and a school and found that commonly-used electronics—including cell phones, laptops, and tablets—are not frequently cleaned and are often contaminated with germs such as ***E. coli*** and **Staph**.

SCHOOL ELECTRONICS

Study participants reported that school devices are typically

(in the summer before school starts)

school devices tested positive for Staph

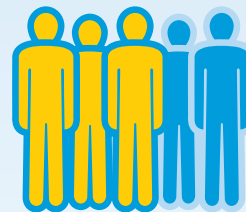

The average school laptop was found to be

than a toilet seat†

OFFICE ELECTRONICS

MORE THAN HALF of study participants reported that their device hadn't been sanitized in the past month

(7% of participants reported they had never sanitized their devices!)

of office laptops tested positive for Staph

The average office laptop was found to be

than a public trash can†

GOOD NEWS

After being sanitized with **Clorox Screen+ Sanitizing Wipes**, Staph and *E. coli* were found on **zero** electronic devices

ZERO

BAD NEWS

However, within **24 hours** of sanitization, **100%** of office devices were recontaminated with bacteria

100%

It's time to say goodbye to germy electronics, and hello to hi-tech hygiene. **Clorox Screen+ Sanitizing Wipes** clean and kill 99.9% of bacteria* on electronics.
