

Product solutions for Long-Term Care, Skilled Nursing, Assisted Living and Other LTC environments

One Facility: Many Areas, Many Surfaces, Many Infection Control Risks

Long-term care residents are at high risk for developing Healthcare Associated Infections (HAIs). Infection prevention and control programs in long-term care facilities can help prevent the spread of infection to vulnerable residents. Proper cleaning and disinfecting programs depend on identifying the challenges and risks within a facility and responding with the most appropriate products.

High Risk Areas/Occurrences

Isolation Rooms, Resident Gathering Spaces (activity room, dining room, lounging areas)

A recent study found that 50% of long-term residents were colonized with MDROs and environmental MDRO contamination was found in 74% of resident rooms and 93% of common areas.¹

Challenges:

- ▶ Pathogen exposure
- ▶ Challenges with isolation compliance

Specialty Areas/Occurrences

Physical/Occupational Therapy, Laundry Rooms, Bio Spills

In one study, over 90% of high-touch surfaces in long-term care facilities tested positive for pathogen contamination.⁴

Challenges:

- ▶ Lots of shared equipment and surfaces
- ▶ Strong odors and stains
- ▶ Many soft surfaces

Medium Risk Areas/Occurrences

Resident Rooms, Equipment, Nursing Stations

Data from 2009–2018 found that 61% of Norovirus outbreaks occur in long-term care facilities (LTCFs).² Outbreaks in LTCFs resulted in costs of \$150–165 million, annually.³

Challenges:

- ▶ Many types of high-touch surfaces and equipment, including personal furniture and items
- ▶ Shared medical and mobile equipment
- ▶ Shared rooms

Common and Staff Areas

Lobbies & Reception Areas, Public Restrooms, Lounges, Breakrooms & Cafeterias, Offices & Conference Rooms

88% of surveyed Americans agree that they would have a negative view of a skilled nursing facility or long-term care facility if it is not clean.⁵

Challenges:

- ▶ Lots of areas to cover quickly
- ▶ High traffic from residents, staff and visitors
- ▶ Variety of hard and soft surfaces requiring cleaning and disinfection
